

Kayak colors

Click to check the complete RAL list. It is possible to combine any of these colours for Deck, Hull and Trim on a custom kayak order.

3kymia aim to have stock kayaks available throughout the season apart from June to September (be sure you order before or after those months).

We don't produce kayaks during those months due to very high temperatures in the factory which is not optimal for gelcoat applications. We will try our best however to keep a big stock of kayaks available for those months.

All kayaks comes with the fittings from Kajaksport (superb quality) and they will be only with the RAL codes below.

If you are interested in a kayak with different RAL codes you will have to mention that to the relevant order form.

Please note that there is a charge of 99€ for custom colors. This is happening as we can't keep a large stock of RAL codes (gelcoat) due to high temperatures espacially during the summer months.

Stock Colors

Below is a list of all our stock colours. These colours do not incur a custom charge, different RAL colors will have an extra charge as we will have to order them for you.

You check out the complete list of RAL colors in this [link](#).
